

ORANGE TREE UTILITY CO., INC
BACKFLOW ASSEMBLY REQUIREMENT NOTICE

DATE : _____

CUSTOMER NAME : _____

ADDRESS : _____

Dear Customer:

In accordance with the Florida Department of Environmental Protection approved Backflow Prevention, Cross Connection Plan for Orange Tree Utility Co, Inc. and the Cross Connection Survey completed, we have determined that you will be required to install and maintain a backflow assembly as indicated below.

 X REDUCED PRESSURE PRINCIPLE ASSEMBLY on the water service line near the meter to your:

DOMESTIC **X** IRRIGATION FIRE LINE

 X HOSE BIB VACUUM BREAKER (S) on all water outlets threaded for hose attachment.

These backflow assemblies must meet the requirements of the Plan and be tested initially and then annually to assure their proper operation. Certified test reports must be supplied to the Utility within 30 days of testing. These assemblies will also be required to be overhauled or certified annually. The assembly installation, initial testing, annual testing and any repairs/overhaul can be directly contracted by you or through Orange Tree Utility.

If you have any questions concerning the Notice or for a list of approved and certified technicians, please contact our office (239) 596-4088. We appreciate your assistance in making the Orange Tree Water Systems safe and reliable.

Authorization to Install Backflow Device

Orange Tree Utility Co., Inc. is hereby authorized to complete the installation and initial testing of the required backflow assembly at the published rate. Orange Tree Utility Co. Inc. will not be responsible for any reinstallation of any landscaping or grass removal for installation of the backflow assembly.
